Tanmay Prasad

Final Year Undergraduate
Department of Biological Sciences and Bio-Engineering

Email: ptanmay23@iitk.ac.in
Tanmay Prasad | Toad0203

Academic Qualifications

Year	Degree/Certificate	Institute	CPI/%
2023 - Present	B.Tech	Indian Institute of Technology, Kanpur	8.0/10
2023	CBSE (XII)	Delhi Public School, Bhopal	94.2%
2021	CBSE (X)	Delhi Public School, Bhopal	96.6%

Work Experience

Developer Intern | CarbonTatva AI (*Mar'26 - Apr'26*)

- Developed and deployed a multi-page startup website with **React and Vite**, implementing responsive UI across multiple pages
- Added inquiry and demo-booking forms with **email-based submission**, routing responses to the company's official work email
- Integrated and customized an **ESG calculator**, adding an interactive sustainability assessment experience directly to the website

Key Projects

Undergraduate Project | Mentor: Prof. Nitin Gupta (BSBE) (*Jan'26 - July'26*)

- Engineered and maintained **automated end-to-end tests using Angular and Cypress** for 6 TreadWill games, **identifying and reporting bugs** that were subsequently resolved by the development team, improving overall game quality and reliability
- Created the complete **Angular 20** frontend for a Schema Therapy trial registration system, covering **participant registration, consent forms, questionnaires, screening assessment, and multi-step navigation** throughout the registration workflow
- Learned and implemented **Django backend APIs with MySQL** to manage participant information throughout the registration process, from initial email capture and personal details to consent and screening test responses and final eligibility verification
- Designed and integrated a **screening test and eligibility system** that evaluated participant responses and triggered automated email-based onboarding process for eligible participants, connecting the Angular frontend with the Django backend and database

Course Helper | Self Project (*Feb'26*)

- Created a full-stack academic resource platform using **React, Node, Express, and PostgreSQL**, for students in the college
- Allowed users to access and upload course materials organized by **course, semester, and professor, with a filtering system**
- Secured resource uploads and other privileged operations through **JWT-based authentication** and protected private routes
- Integrated **Cloudinary** for cloud storage of uploaded files, associating stored URLs with corresponding records in PostgreSQL
- Designed a relational database schema and RESTful APIs for resource management, supporting resource retrieval and filtering

Lost and Found | ACA Summer Project (*May'25-Jun'25*)

- Developed a full-stack lost-and-found platform using **React, Node, Express, and PostgreSQL**, for students in the college
- Enabled users to report, browse, search, and track lost or found items across campus, with efficient access to detailed item reports
- Built a responsive frontend with **Material UI**, using modular, reusable components for accessible interaction across devices
- Integrated **JWT-based authentication**, with a structured PostgreSQL schema for managing users, items, and report status
- Deployed the application through **Vercel**, enabling live previews, continuous integration, and streamlined application delivery

Expenses Tracker | Self Project (*Jan'26*)

- Built a responsive expense-tracking web application using **Angular**, with a **component-based architecture** for UI design
- Enabled users to add, delete, and categorize expenses, with real-time updates to financial summaries and overall expenditure
- Implemented **local storage persistence** to retain data across sessions and used Angular services for overall state management
- Crafted a clean, intuitive interface with **interactive charts** for visualizing spending patterns across categories and time periods

Blogging Web App | Self Project (*Jan'26*)

- Built a web-based blogging platform using **Node and Express**, enabling users to create, store, and dynamically display blogs
- Implemented **RESTful routes and EJS server-side rendering** for blog post management and dynamic HTML generation
- Utilized in-memory or **local file-based storage** for blog data, enabling content updates without requiring full page reloads

Technical Skills

- **Programming Languages:** C, C++, HTML, CSS, JavaScript, TypeScript, SQL, Python
- **Frameworks & Libraries:** Angular, React, Django, Node, Express, Django REST Framework, Numpy, Pandas, Matplotlib
- **Databases & Tools:** MySQL, PostgreSQL, Git, GitHub, Vite, Postman, Cloudinary, Cypress, Jupyter, Google Colab, Figma
